LOCAL AND PERSONAL

Fresh vegetables received every Tuesday and Friday mornings. W. B. Jones & Co.

C. C. Layton received a fine registered Hereford bull from Kansas, Thursday.

While the present dry weather is rather hard on farmers, it will be worth thousands to stockmen, in as much as it has aided a worm in almost completely exterminating the loco weed in this section.

R. Hascal Todd came in Wednesday from the JG Bar ranch, for an engine to assist the wind mill in pumping water for the stock.

Ab French brought in a ten gallon well on his place 15 miles south-east of Kenna last week.

E. F. Hill of Dandridge, Tennessee, is in town the guest of L. C. Denton and family. Mr. Hill is looking over the country with a view of locating.

OLIVE ITEMS

County Superintendent—
MRS. T. W. HAYES

United States Senate
Washington, D. C.

To the Editor:—

I am sending you a copy of the "Final Report of the Commission on Industrial Relations," which I trust comes to your hands safely. I believe you will find it a very interesting document and no doubt there are many persons in New Mexico who would like to get a copy. I suggest that you give it some mention in your paper, calling attention to the fact I will be glad to furnish copies until the supply is exhausted.

I wish you would give further mention to the Agricultural Year Book, 1915. This publication is replete with information for the farmer and stockman and my personal opinion is that it should be in possession of every one engaged in these occupations. I have nearly a thousand copies left and will be glad to fill every call until there are none left. Senator Fall and Hon. B. C. Hernandez likewise will be glad to furnish copies until their supplies are gone, as also copies of the report of the Commission on Industrial Relations.

Yours very truly,
T. B. Catron.

Looses Three Fingers.

On last Friday, Bert L. Miller, who lives about 18 miles south-east of Kenna, caught his left hand in the pulley of a well drill, completely severing two fingers from his left hand, and mangleing a third till amputation was necessary. He was carried to Elida for surgical attention.

LIVESTOCK

Kansas City, Monday, June 19, 1916.—Arrivals of cattle today were much larger than expected and the market had a decidedly weaker tendency except for strictly dry lot steers, and few in that class were offered. The day's trade added nothing new in the general tendency in the market as the price movement is increasing the spread in quotations, by maintaining high record levels for the dry lot steers, and the half fat, especially those cattle that have made weight gains on grass, are lower. The extremes in the market today were steady to fifteen cents lower, mostly ten cents off. The fat steers here today came from a wide area, Texas sending in liberal supplies from below the quarantine line. A train load of steers came from Arizona, Oklahoma, Colorado and Nebraska were fairly well represented and Kansas had a good many wintered, grass fat steers here today. The range in prices was \$6.50 to \$10.75, mostly \$8.25 to \$10.25. The lowest priced steers were on the quarantine side. Cows and heifers were in limited supply and mostly steady in price. Demand for stockers and feeders was active, and prices for stockers was stronger. Receipts were limited. Most of the good stockers sold at 7.50 to \$8, and feeders up to 7.50. Hog prices were down to 5 to 10 cents and about 20 cents under the high point last week at the opening today but at close of market, prices ruled steady to strong with active demand. The top price was 9.70 and the bulk of sales ranged from 9.40 to 9.65. Lambs were quoted 10 to 15 cents lower and sheep were steady. Most of the offerings were spring lambs that brought 10 to 10.75, top Arizona lambs 11. Slipped Texas sheep brought 6.75 to 7.00, and breeding ewes sold up to \$8.

THE BREAD PROBLEM

You need not read this unless you eat bread. You know this flour proposition has been fierce for some time, and I have been looking for a flour that I thought would do to trust, and as good luck would have it, I found where I could get the

FANCHON

an old reliable brand that I have handled for years before coming to this country, and have never found any thing to equal it. It is backed with an Iron Clad Guarantee—use half the sack and if not satisfactory return the other half and get your money back. I am now unloading a car and want everybody that eats bread to try it. I have a number of 2 pound sample sacks. Don't fail to call for one. I have many other things in my store that I want to sell and I want to buy everything you have to sell that I can turn into money. Be sure to see us before buying.

Yours for an honest deal.

W. B. Jones & Co.

THE REASON WHY--

many people never have their share of this world's good things is because they fail to cooperate with their own interests, many of them without thinking to be sure, but never-the-less to their own injury.

For Instance: If you are not patronizing your home bank you are not cooperating with one of your best interests. You surely know that a good safe bank in your community substantially enhances the value of your land. It helps you get a better sale for your cattle and produce by keeping constantly on the alert to bring buyer and seller together to the best advantage. It is not altogether through selfish motives that your home bank solicits your cooperation, but the interests are mutual. We need your patronage and cooperation to increase our strength and ability. You need your home bank at its best strength and ability, for it speaks well for your community, enhances the value of all your property, finances your business in a pinch and keeps the wolf from the door. We need you. You need us. Let's cooperate, we will meet you half way.

Loses Cow From Snake Bite.

It is reported that Chas. Harber lost one cow and came near losing two others this week from a rattle snake bite.

The following simple remedy has been used with success by the writer and will possibly prove of value to the readers of this paper:

First split the wound open so that it will bleed freely, then

and coal oil over the affected part, renewing as often as it becomes saturated with the poison. Another remedy used in the National Forests and said to be very effective, is, after splitting the wound, insert a small lump of blue vitriol.

Trouble Seeker.

Bronson—You look unhappy, old fellow.
Woodson—I am.
Bronson—What's the trouble?
Woodson—Well, you see, Gills told me that next summer is going to be a scorcher, and I read somewhere that ice will cost twice as much this year as last owing to the mild winter.
